

# HH-2322-13

The ZF-2228-5 filter has been designed for systems operating under the requirements of MIL-STD-461D, E, F or G. It has a standard 1/2 brick footprint. It has been used successfully with the GE JNC350R series converters

Operating Voltage = 0—50Vdc  
 Operating Current = 13.0 Ampere  
 Temperature Range (Storage) = -40 to 125° C  
 Temperature Range (Operating) = -40 to 85° C  
 Dielectric Withstand (L-Grd), (1 Minute) = 1000 Vdc  
 RoHS compliant

Order P/N: **HH-2322-13**
